

# BUY 3 Boxes of Protein Concentrators GET ONE box FREE

Vivaspin centrifugal concentrators offer the optimal solution to any concentration or buffer exchange application with their broad range of volume capacities and MWCOs.

Sartorius provides a comprehensive range of process alternatives for the filtration and concentration of biological samples.

Methods include:

- ▶ Centrifugal Filtration
- ▶ Pressure Filtration
- ▶ Gas Pressure Filtration
- ▶ Tangential Flow Filtration
- ▶ Solvent Absorption

They are perfect for:

- ▶ Concentration of proteins
- ▶ Desalting and Buffer Exchange
- ▶ Removal of primers from PCR amplified DNA
- ▶ HPLC sample preparation
- ▶ Cell washing, virus purification, cell debris removal, depyrogenation
- ▶ Sample concentration for crystallization and NMR spectroscopy
